

Mustapha El Chmouri

EDUCATION

(+44) 7440 220991 | [e-mail](#) | [LinkedIn](#) | Operations and Optimisation

Imperial College London

MSc in Control and Optimisation

- **Thesis titled:** Robust Control of Grid-interface Inverters of Renewables.

London, UK

Sep. 2023 – Jun. 2025

American University of Beirut

B.E. in Electrical and Computer Engineering

- Enlisted in the **Dean's Honor List** in all semesters (GPA: 3.9/4.0)

Beirut, Lebanon

Aug. 2019 – Jun. 2023

EXPERIENCE

Linjer Jewelry

International Operations and Automation Lead

- Boosted operational efficiency by 40% by automating manual Excel workflows and mapping end-to-end processes for returns, refunds, and CX tasks.
- Increased post-purchase revenue by six figures by redesigning the returns and exchange flow, introducing store credit incentives, and tightening refund controls.
- Recovered operational costs by building data-driven reconciliation processes to identify and reclaim overpayments.
- Improved website performance and content visibility by conducting PageSpeed audits and implementing structured, LLM-ready content pipelines, increasing content reach by 32%.
- Standardised cross-functional processes by translating informal team practices into documented, repeatable systems used across CX, finance, and operations.

London, UK

Sep. 2025 – Present

Baker Hughes

Performance Analytics Intern

- Led the creation of innovative thermodynamic performance monitoring and diagnostic tools, significantly boosting operational efficiency.
- Directed the development of advanced thermodynamic monitoring systems for energy sector equipment, resulting in a 50% increase in design throughput.
- Collaborated with cross-functional teams to integrate monitoring solutions, ensuring seamless deployment.

Dubai, UAE

Jun. 2022 – Aug. 2022

EXTRACURRICULAR ACTIVITY

IEEE Fourth Year Student Representative | IEEE - AUB Student Branch

Sep. 2022 – Jun. 2023

- Assisted in increasing the reach of events by broadcasting invitations to 200+ students.
- Helped in organising workshops on work experience and graduate schools, hackathons, and boot camps.
- Raised over \$1,000 through bake sales to support the education of orphan refugee girls.

Head of PR | Investment Club, AUB

Nov. 2022 – Jun. 2023

- Secured multiple sponsorships and led collaborations with other AUB clubs and external universities, resulting in a 30% increase in event engagement across the academic year.
- Organised a high-profile cross-university debate, strengthening the club's global presence and expanding its network.
- Sourced and coordinated industry speakers for club events, contributing to a 61% growth in active membership.

PROJECTS

Smart Vital Sensors (Final Year Project) | Flutter, NoLimits2, Unity, ML, VR

Sep. 2022 – May 2023

- Created a custom VR rollercoaster scene and tested it on 50+ participants while measuring their physiological parameters to build a dataset augmented with cybersickness readings using the Simulator Sickness Questionnaire (SSQ) and their responses.
- Developed several ML models to predict cybersickness in the VR setting, performing both binary and ternary classification using different algorithms (KNN, Logistic Regression, and Random Forests) trained on the built datasets, achieving a maximum accuracy score of 85%.
- Accepted into the iMETA 2023 conference (but not published).

SKILLS AND LANGUAGES

Programming & AI: Python (Pandas, NumPy, scikit-learn), SQL, C/C++; ML modelling, data pipelines, LLM API integration, workflow automation

Systems & Automation: API integrations, process automation (Zapier), internal tooling, performance optimisation, REST/webhooks

Engineering Tools: MATLAB, Simulink, LabVIEW, Arduino, digital systems and control modelling
